INTRODUCING ALTERNATIVE MODEL TO CFS-308

We would like to hereby introduce alternative model to CFS-308 today.

We have been receiving so many orders from the customers that it exceeds our production capacity. Despite our much of efforts, CFS-308 continuously holds a serious lead-time issue.

Moreover, due to price decline after economic downturn in 2008 and manufacturing equipments becoming decrepit, it is now unavoidable for our reduction in production capacity, which obviously lead to worse delivery for our customer.

Therefore please allow us to obtain your generous understanding and support in purchasing CFS-206 series alternatively to CFS-308. By consolidating orders into CFS206, we aim to provide you better and more fulfilling support.

Thank you and best regards,
